Captioneer

Captioneer is an extension for Adobe Premiere Pro to create captions from Motion Graphics Templates (.MOGRTs). Captioneer is compatible with Premiere Pro version CC2022 and later.

HOW DOES IT WORK?

Watch the Quick-Start Tutorial here. The Captioneer User Guide is here.

INSTALLATION

Watch the How To Install video here.

1. Quit Premiere Pro if it is running.
2. Download and install the free ZXP/UXP Installer from:
    a. https://aescripts.com/learn/zxp-installer/
3. Drag **Captioneer.zxp** onto the ZXP/UXP Installer to install the extension.
4. Open Premiere Pro.
5. Navigate to the menu bar and click **Window > Extensions > Captioneer** to open the extension.

FREE TRIAL

Captioneer comes with a free, no-commitment 14-Day Trial.

ACTIVATION

Lifetime and Subscription licenses for Captioneer can be purchased from:
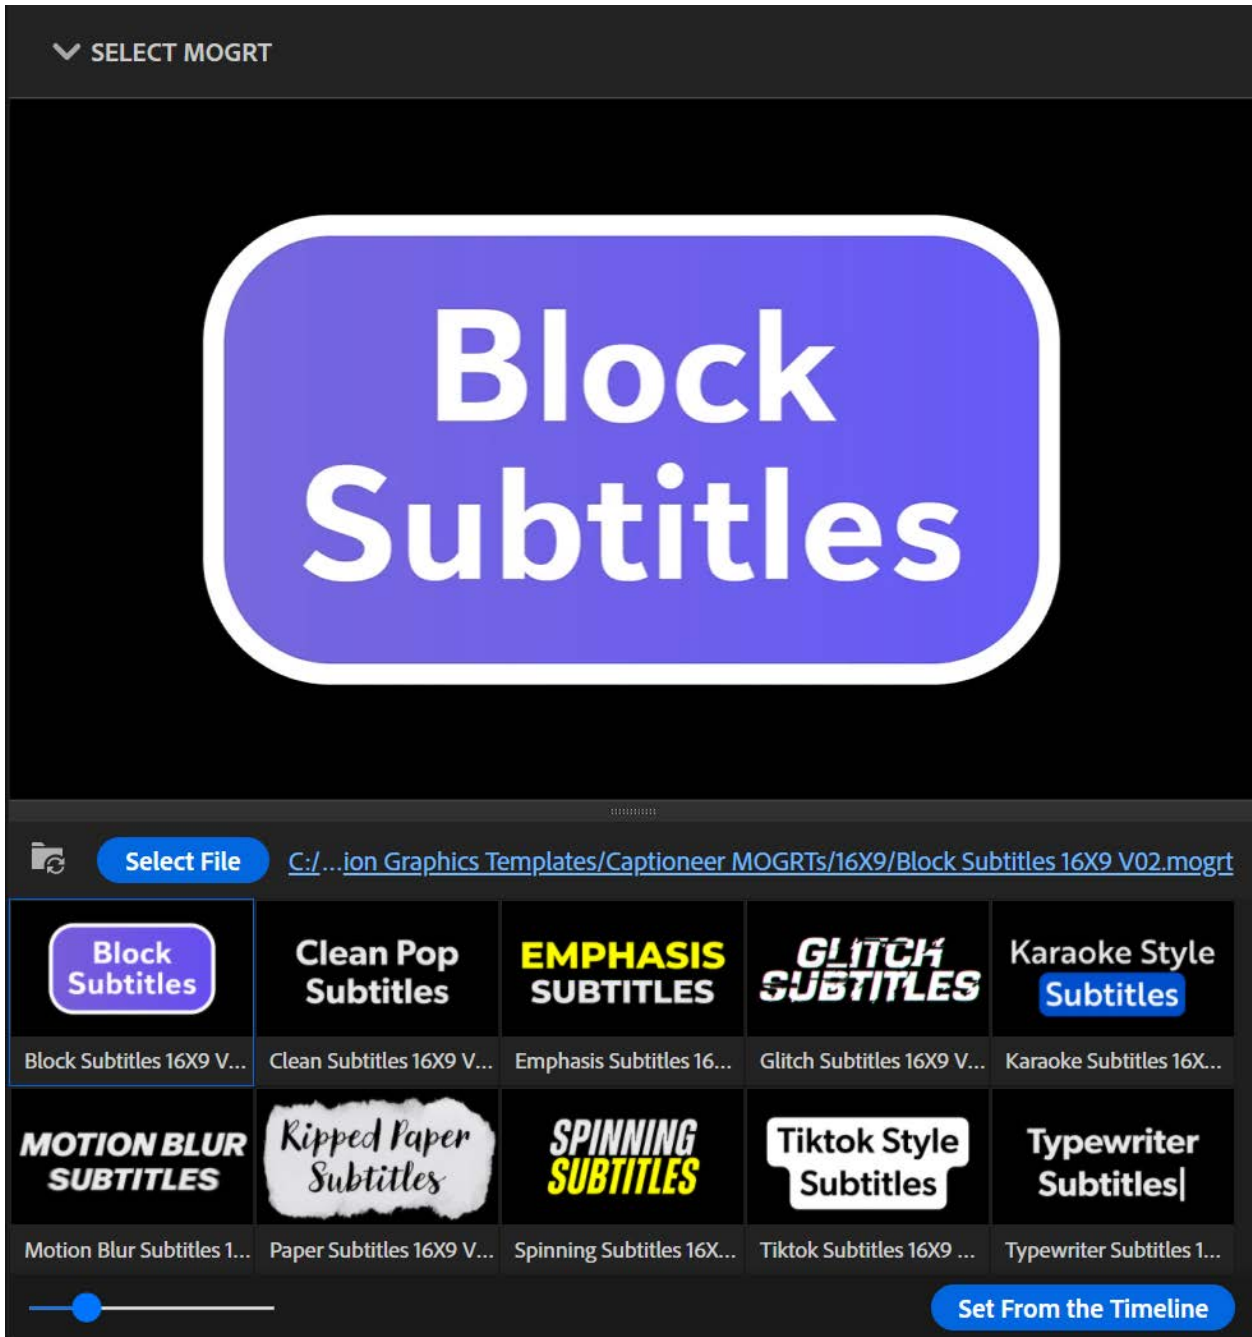

https://captioneer.tv/

To activate a license, click the **Settings** gear inside Captioneer extension window. Click the **Activate License** button and enter your email and license code.

MOTION GRAPHICS TEMPLATES

Captioneer comes with 10 Motion Graphics Templates (.MOGRTs). They are designed for vertical social media, but flexible for any resolution.

MOGRTs load inside the **Select Mogrt** tab.

By default, Captioneer loads MOGRTs from Premiere Pro's Local Templates Folder (the "Motion Graphics Templates" directory):

Windows: C:\Users*username*\AppData\Roaming\Adobe\Common\Motion Graphics Templates\

Mac OS: ~/Users/*username*/Library/Application Support/Adobe/Common/Motion Graphics Templates/

You can add or remove any folder for use with the extension.

To load MOGRTs from a custom folder, click the **Settings** gear inside the extension window. Hit **Add Folder** and browse to your custom folder location.

Captioneer is compatible with any MOGRT exported from Adobe After Effects.
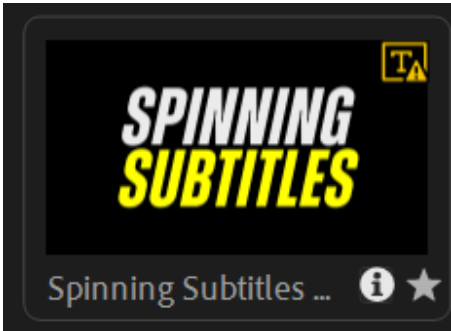

Motion Graphics templates compatibility

- **https://helpx.adobe.com/premiere-rush/kb/stock-compatibility-mogrt.html**

- *Note that MOGRT files are not backwards-compatible with older versions of Premiere (i.e. a MOGRT exported from AE 2022 can be opened in Pr 2022+, while a MOGRT exported from AE 2024 must be opened in Pr 2024+).*

FAQ

I installed Captioneer but it won't open in Premiere Pro.

There was an issue with your installation. Please uninstall and reinstall the latest version of Captioneer. Follow the re-install instructions for Mac & PC **here**.

Fonts in the MOGRTs aren't syncing.

Captioneer MOGRTs use Adobe Fonts to auto sync fonts. If font sync fails, go to **Essential Graphics > Browse** and manually drag the .mogrt onto the timeline to trigger auto sync via Creative Cloud.

Alternatively, hit the "i" icon to see the name of the font. Go to **fonts.adobe.com** and manually sync fonts.

How many licenses do I get?

Each license allows 1 active computer. For additional computers, purchase multiple Subscriptions or Lifetime licenses.

Can I move my license between computers?

Yes, you can switch computers at any time. Go to **Settings > Remove License** to deactivate your license key, and then activate your key on the other computer. Or you can use the online **License Manager**.

I received an error code.

If Captioneer alerts an error code that prevents your work, please email: **support@captioneer.tv**.

ALTERNATIVE MOGRTs

Captioneer comes with 10 vertical 9X16 MOGRTs.

Widescreen and square (16X9 and 1X1) MOGRTs are available for free download in the **Captioneer Store**.

NEW MOGRTs

1. Download new MOGRTs from online marketplaces like **Motion Array**, **Adobe Stock**, or **Envato**.

2. Additional MOGRTs are available in the **Captioneer Store**.

3. Build your own MOGRTs in After Effects!
